

Objectively present the current situation and lead the way to realizing the vision

# Introduction to "1-Day Factory Diagnosis Program"

## 1 What is "1-Day Factory Diagnosis" ?

- ▶ Based on the on-site principle, we investigate and analyze the factories, evaluate their characteristics and levels, and clarify the ideal situation.

## 2 Four Characteristics of "1-Day Factory Diagnosis Program"

- ▶ All departments, including production, design and development, and purchasing and procurement, can be diagnosed free of charge.

POINT  
1

**The factory diagnosis is scheduled to be completed in one day.**

A consultant who is well versed in "Points to See" gathers the necessary information in one day.

POINT  
2

**We objectively review the facts on the worksites from a third party perspective.**

Identifying issues from past, current and future perspectives through on-site observations and interviews.

POINT  
3

**Conducting hearings for management and front-line employees**

Consider the ideal form from the latent gap between the management's ideal and the frontline worries.

POINT  
4

**Frank exchange of opinions through free discussions**

At the time of closing, opinions are exchanged with management and executives to facilitate communication for proposals.

## 3 Expected benefits

- ▶ You will be able to learn about your company's unique issues and solutions that are not known in other companies' case studies.

**You can see the objective view.**

You can get a professional, thirdparty view of your company's current situation.

**A report on the diagnosis results**

**You can know how to solve specific problems.**

You can see the solution of future-oriented management issues.

**Consulting planning proposal**

**You can create an opportunity for change.**

You can build momentum for internal change.

**Factory diagnosis /Report session**

## 4 Steps for Implementing 1-Day Factory Diagnosis Program

- ▶ Based on the three actual -place, item, situation- principles, we will grasp your company's issues from both quantitative and qualitative perspectives.

### One day

#### STEP 1 1-Day Factory Diagnosis

- [AM] • Top interview  
• Site inspection
- [PM] • Site inspection  
• Interview with site managers  
• Discussions with interviewees

### About one to two weeks

#### STEP 2 Analysis and Assessment

- Quantitative and qualitative analysis of the current situation
- Current performance evaluation
- Identifying issues for corporate reform

### About 2 hours

#### STEP 3 reports and proposals

- Report on the results of 1-Day Factory Diagnosis
- Proposal specific measures for factory reform aiming for ideal worksites conditions

*We will discuss the specific schedule for each factory in advance.*

## 5 1-Day Factory Diagnosis Program : Three reassurances

- ▶ The 1-Day Factory Diagnosis program is an effective method for the future without burden.

### 1 Execution of Non-Disclosure Agreement

We will treat your valuable information with care.

### 2 No obstacles to operations on the day

We will inspect the situation under normal conditions.

### 3 No need to prepare financial data

There is no burden on you for diagnosis.

**If you have any further requests or questions, please feel free to contact us.**
